SEQUEL TABLE

S-RS • 25"H X 18"Diameter

Few occasional pieces offer more visual impact than our Sequel Table. Made of solid, hand-finished North American hardwood, the table features three legs that arc as they rise, forming a reverse taper. The legs culminate at a single, hand-turned column that rises to the base of the tabletop. Designed by David Moser, the table traces its lineage to Asian design movements that embrace the organic flow of natural forms.
