## HARTFORD COFFEE TABLE

H-CT • 17" H X 50" W x 29" D

The oval shaped top of the Hartford coffee table sits on three legs, rather than the expected four. Each leg comes through the top to become a visible joint. What is different than most Moser through tenons is that this joint is not wedged. This requires greater precision but affords a more contemporary take on the traditional joint. For added durability, the joint is pinned from beneath the top.
